"In the end, it is almost always the simple forms that endure."

VOLKER REICHERT, DESIGNER

A system that adapts to any architecture.

modul21 is a seating system made of individual upholstered modules. Every module follows the same 20 centimetre grid, and an aluminium beam connects them. The result: stools, benches, sofas and entire seating landscapes for reception, waiting area, office and home.

The form is deliberately simple. It defers to the space and yet keeps a character of its own. And because every piece can later be rebuilt, extended or re-covered, it stays in use for a long time.

Built individually for each space.

01

Made by hand

Every piece is made only once it has been planned.

02

Made in Germany

Made in Germany, with materials from renowned manufacturers.

03

Over 10 million options

You choose form, size, cover and colour.

04

20 cm grid

One dimension for all modules. Rebuild and extend at any time.

For spaces where it will be seen.

Culture and museums · Boardrooms and law firms · Showrooms · Foyers · Office · Practice

Special places,
special people,
special furniture.

pull

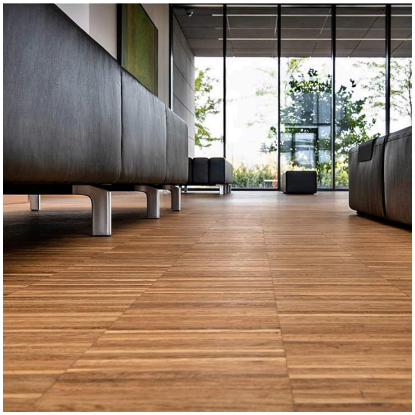

Elementar Analysensysteme

Reception hall over two storeys. Benches and sofas in black leather in front of large-format art.

Location	Langenselbold
Design	winter-bauconcept
Furniture	Reception, black leather

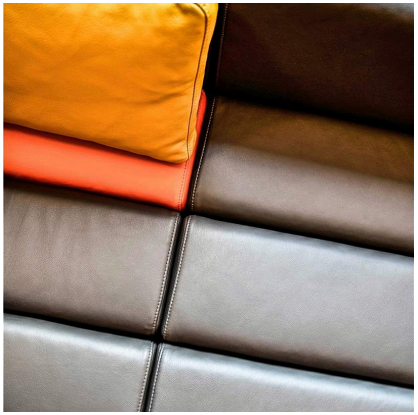

Villa FSD, listed building

Consulting rooms in a listed villa. Long sofas in leather, shelf modules and cushions in two accent colours.

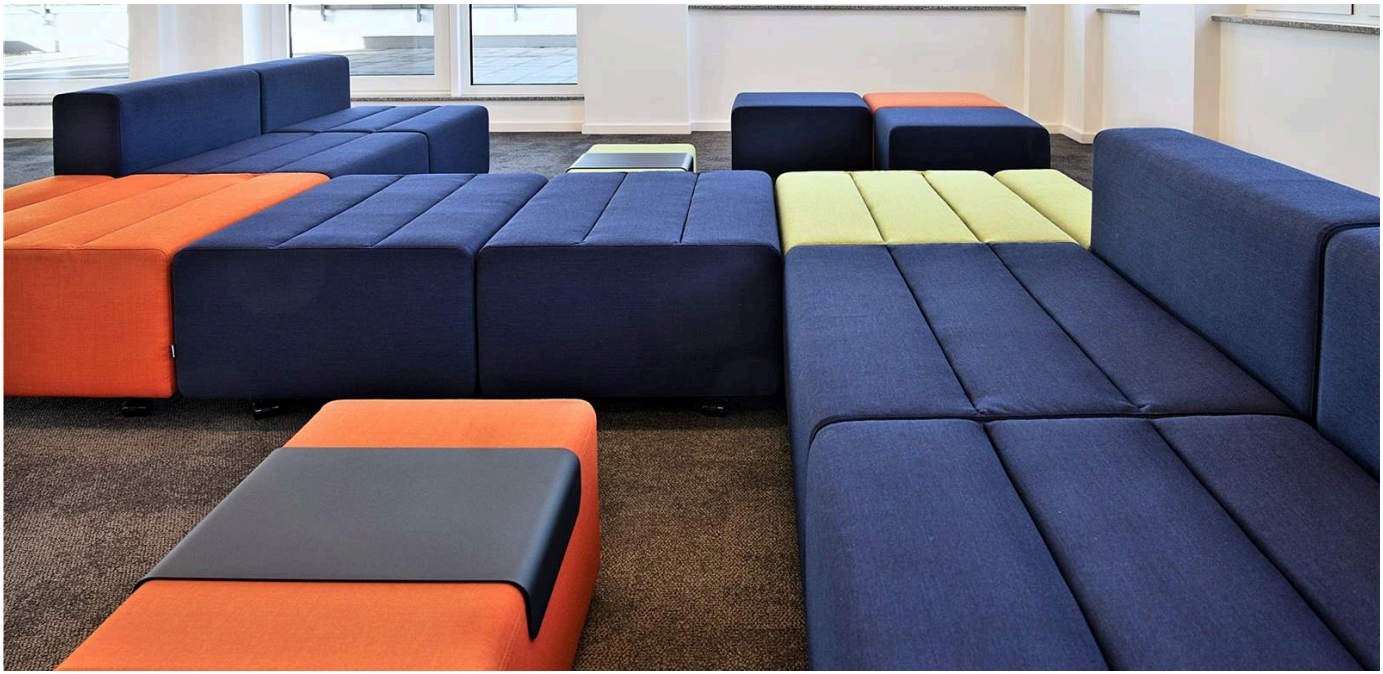

Location	Dresden
Design	ehrlich+richters
Furniture	Consulting rooms, leather

PepsiCo Deutschland

Seating landscape for the central zone. Modules on castors that can be rearranged for every event.

Location	Neu-Isenburg
Design	XQUADRAT GmbH
Furniture	Kvadrat Remix, on castors

Weidmüller Interface

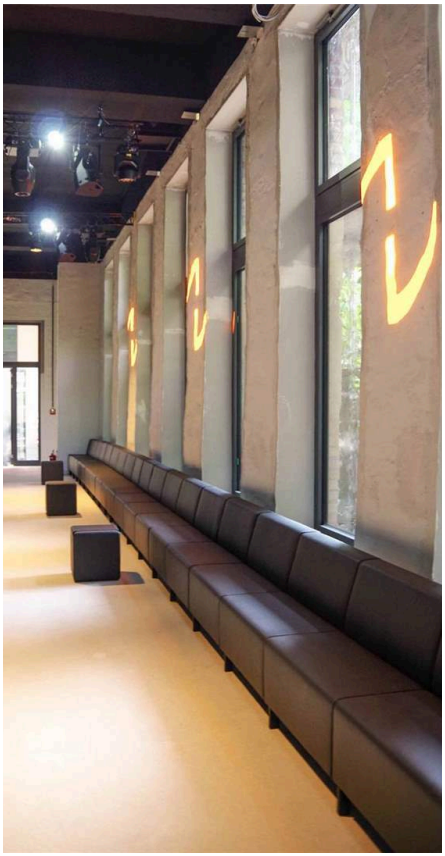

Lounge and waiting areas in the Customer & Technology Center. Benches and stools on the same grid, in two colours.

Location	Detmold
Design	bkp GmbH, Düsseldorf
Furniture	CL Classic, Kvadrat Steelcut
Feet	Aluminium, black

More projects.

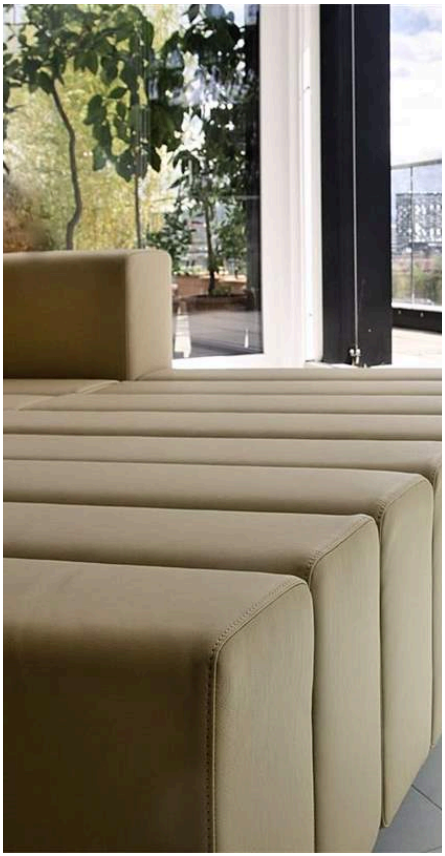

Berliner Ensemble, Neues Haus

Location	Berlin
Design	Möhring Architekten
Furniture	Two benches, 27 m, leather

Foyer with timber slats

Furniture	Benches and stools, wool fabric

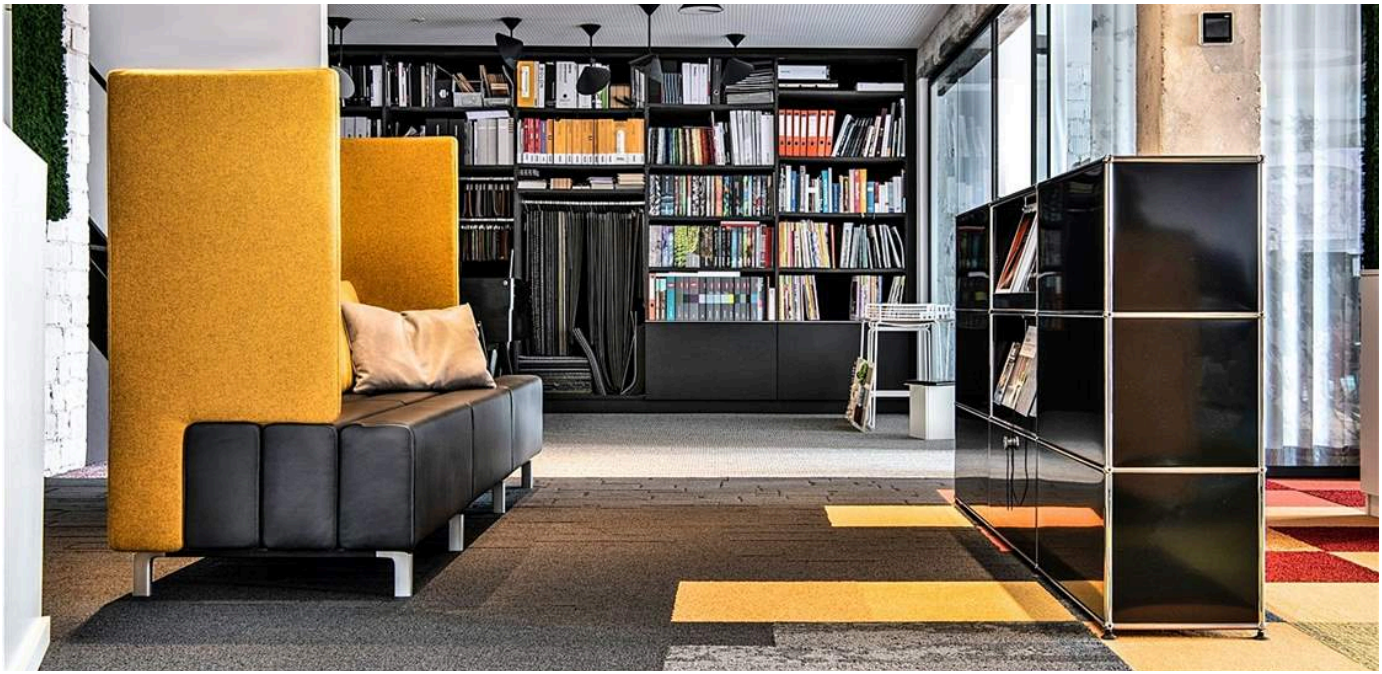

PH Zürich

Location	Zürich

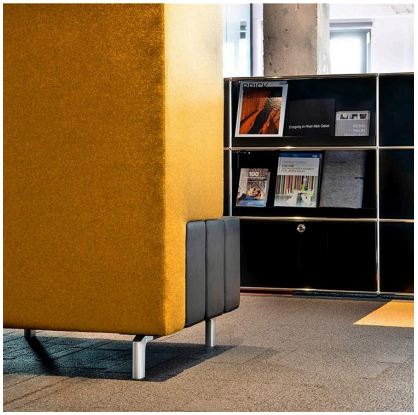

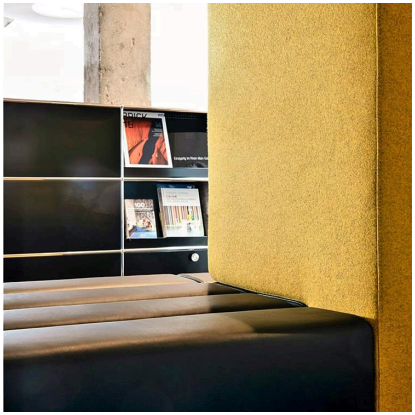

Office with high back panels

Places of retreat in the open-plan office. The high cover back modules provide screening without dividing the room.

Use	Office, central zone
Furniture	Sofas with cover back modules, 120 cm

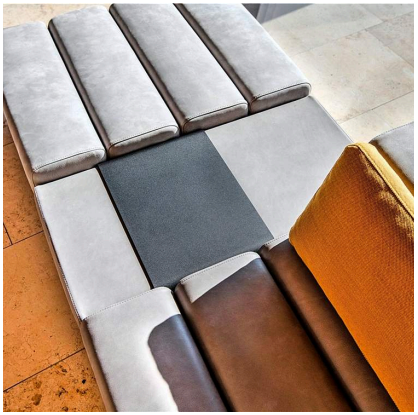

Golf club

Seating island in the foyer of the clubhouse. Light seat modules, a back in wool fabric, a shelf module in leather.

Use	Clubhouse, foyer
Furniture	Island with back and shelf module

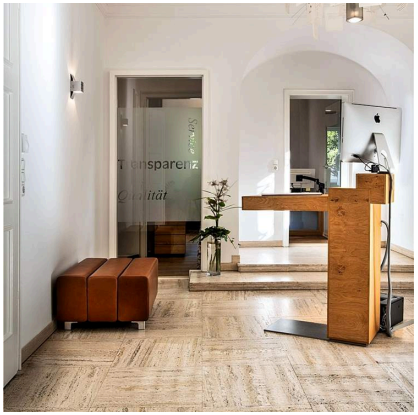

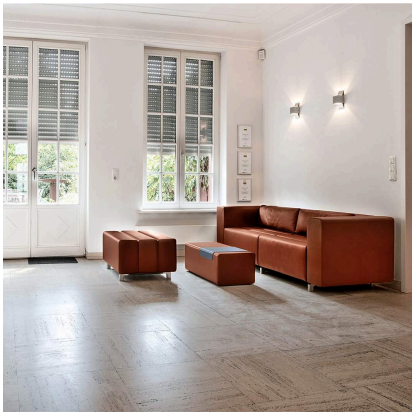

Dental practice

Reception and waiting area in a period building. Sofa, armchair and stool in cognac-coloured leather.

Use	Reception, waiting area
Furniture	Sofa, armchair and stool, leather

Studio

A sofa as a room within the room. The high back in wool fabric, the seat modules in leather, on aluminium feet.

Use	Meeting and retreat
Furniture	Sofa with cover back modules

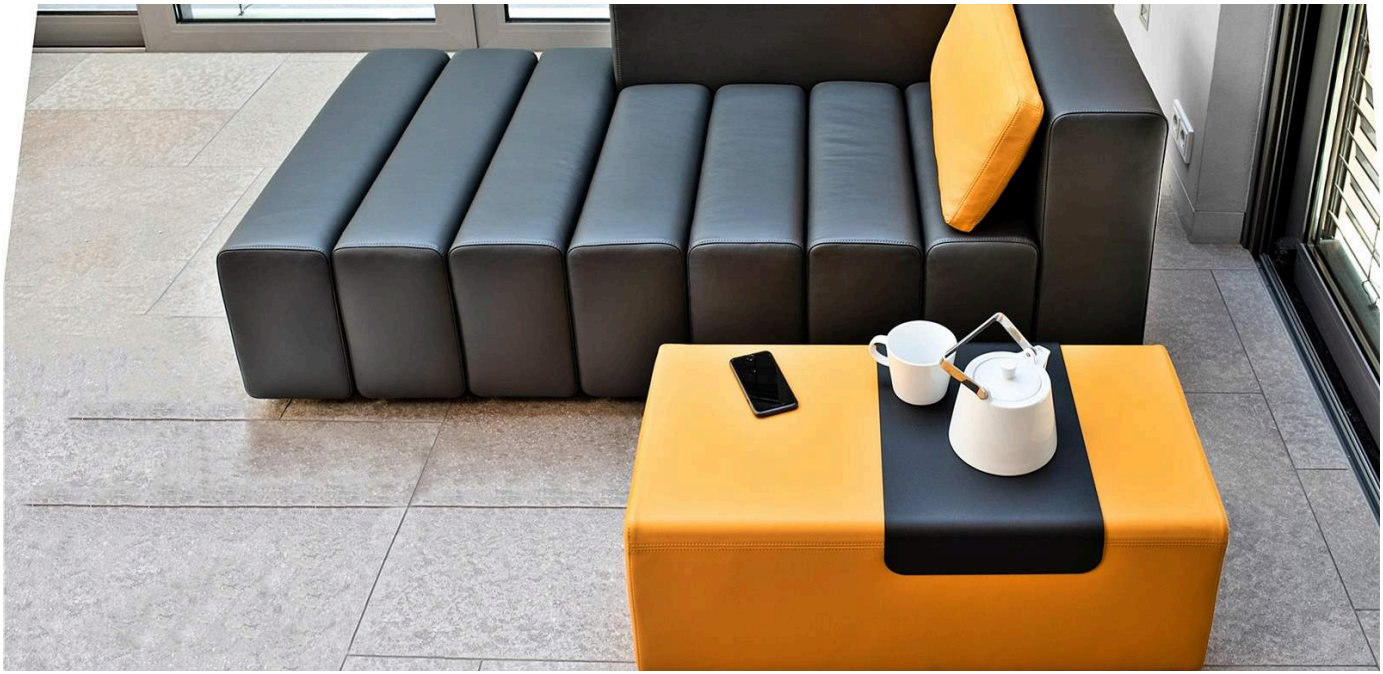

At home on the same grid.

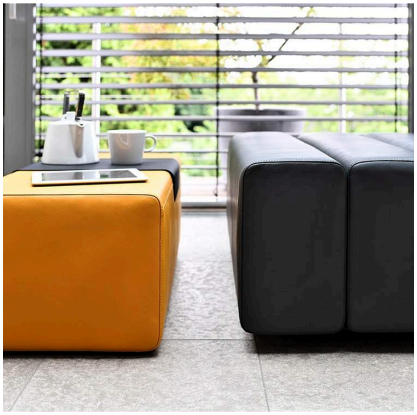

The same modules, the same craft: for living room, library, entrance and garden room.

Sit, lie down, put things down.

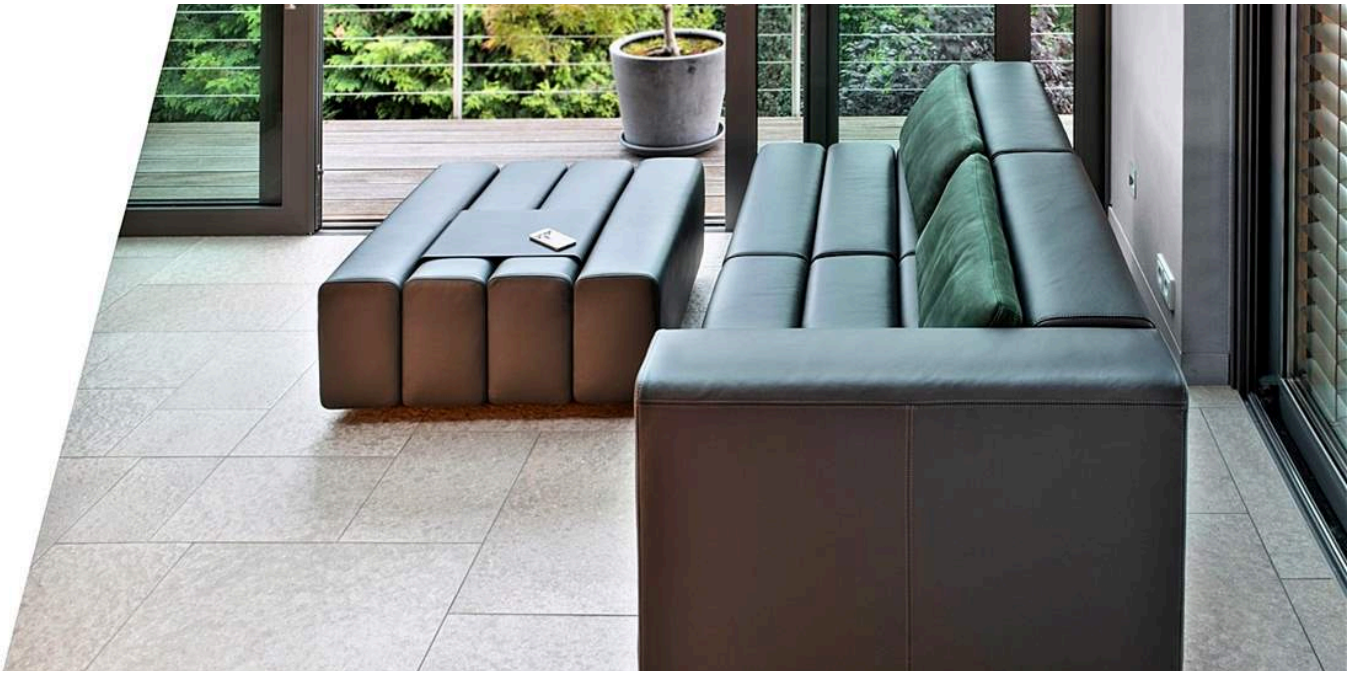

A chaise longue with back and cushions, in front of it a stool as a table. Everything stands on the same grid and can be rearranged.

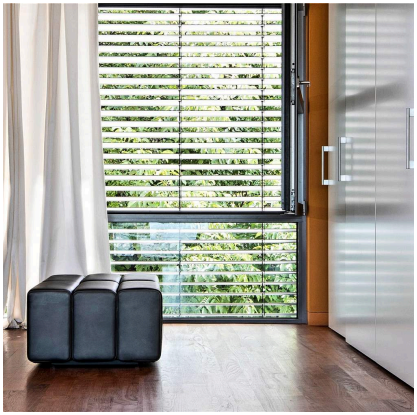

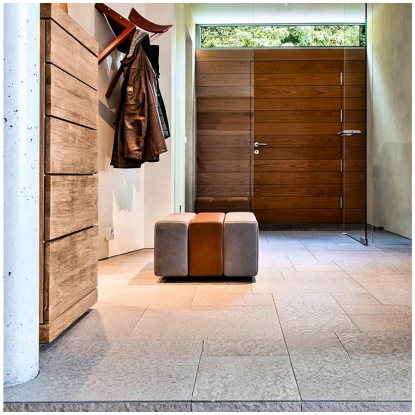

Free-standing in the room.

Without a wall behind it, the piece works from all sides. Double-sided back modules turn one bench into two rows of seats.

From stool to landscape.

A single stool in the entrance, a bench by the window, a sofa in the living room. The system starts with one module.

Not mass-produced.

Made individually, to your design.

Only the best is good enough.

Aluminium

The beam connects all modules. Designed for heavy loads and many years of contract use.

Wood

The carcass: light and stable.

Cold-cure foam

High quality and flame-retardant, for a long life.

Cover

Wool and leather. Contract grades with fire protection.

Six parts, one piece.

01 Back cushion

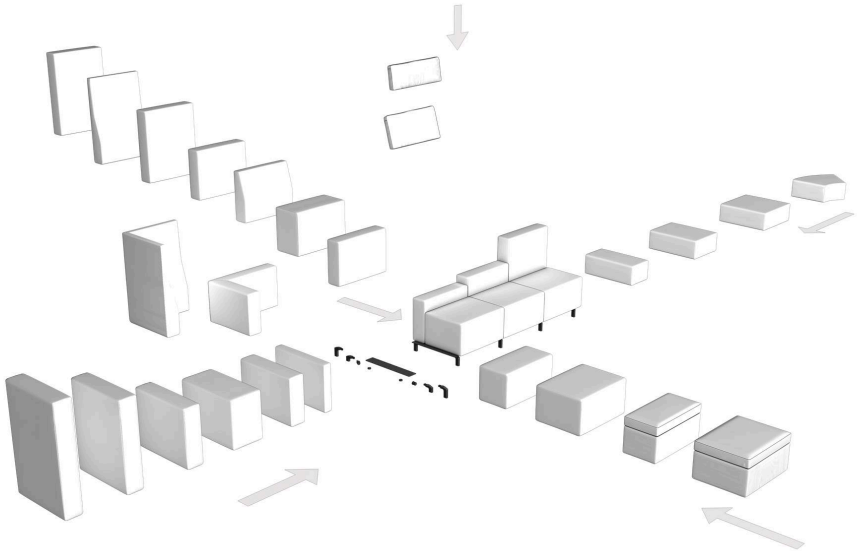

02 Back module

03 Armrest module

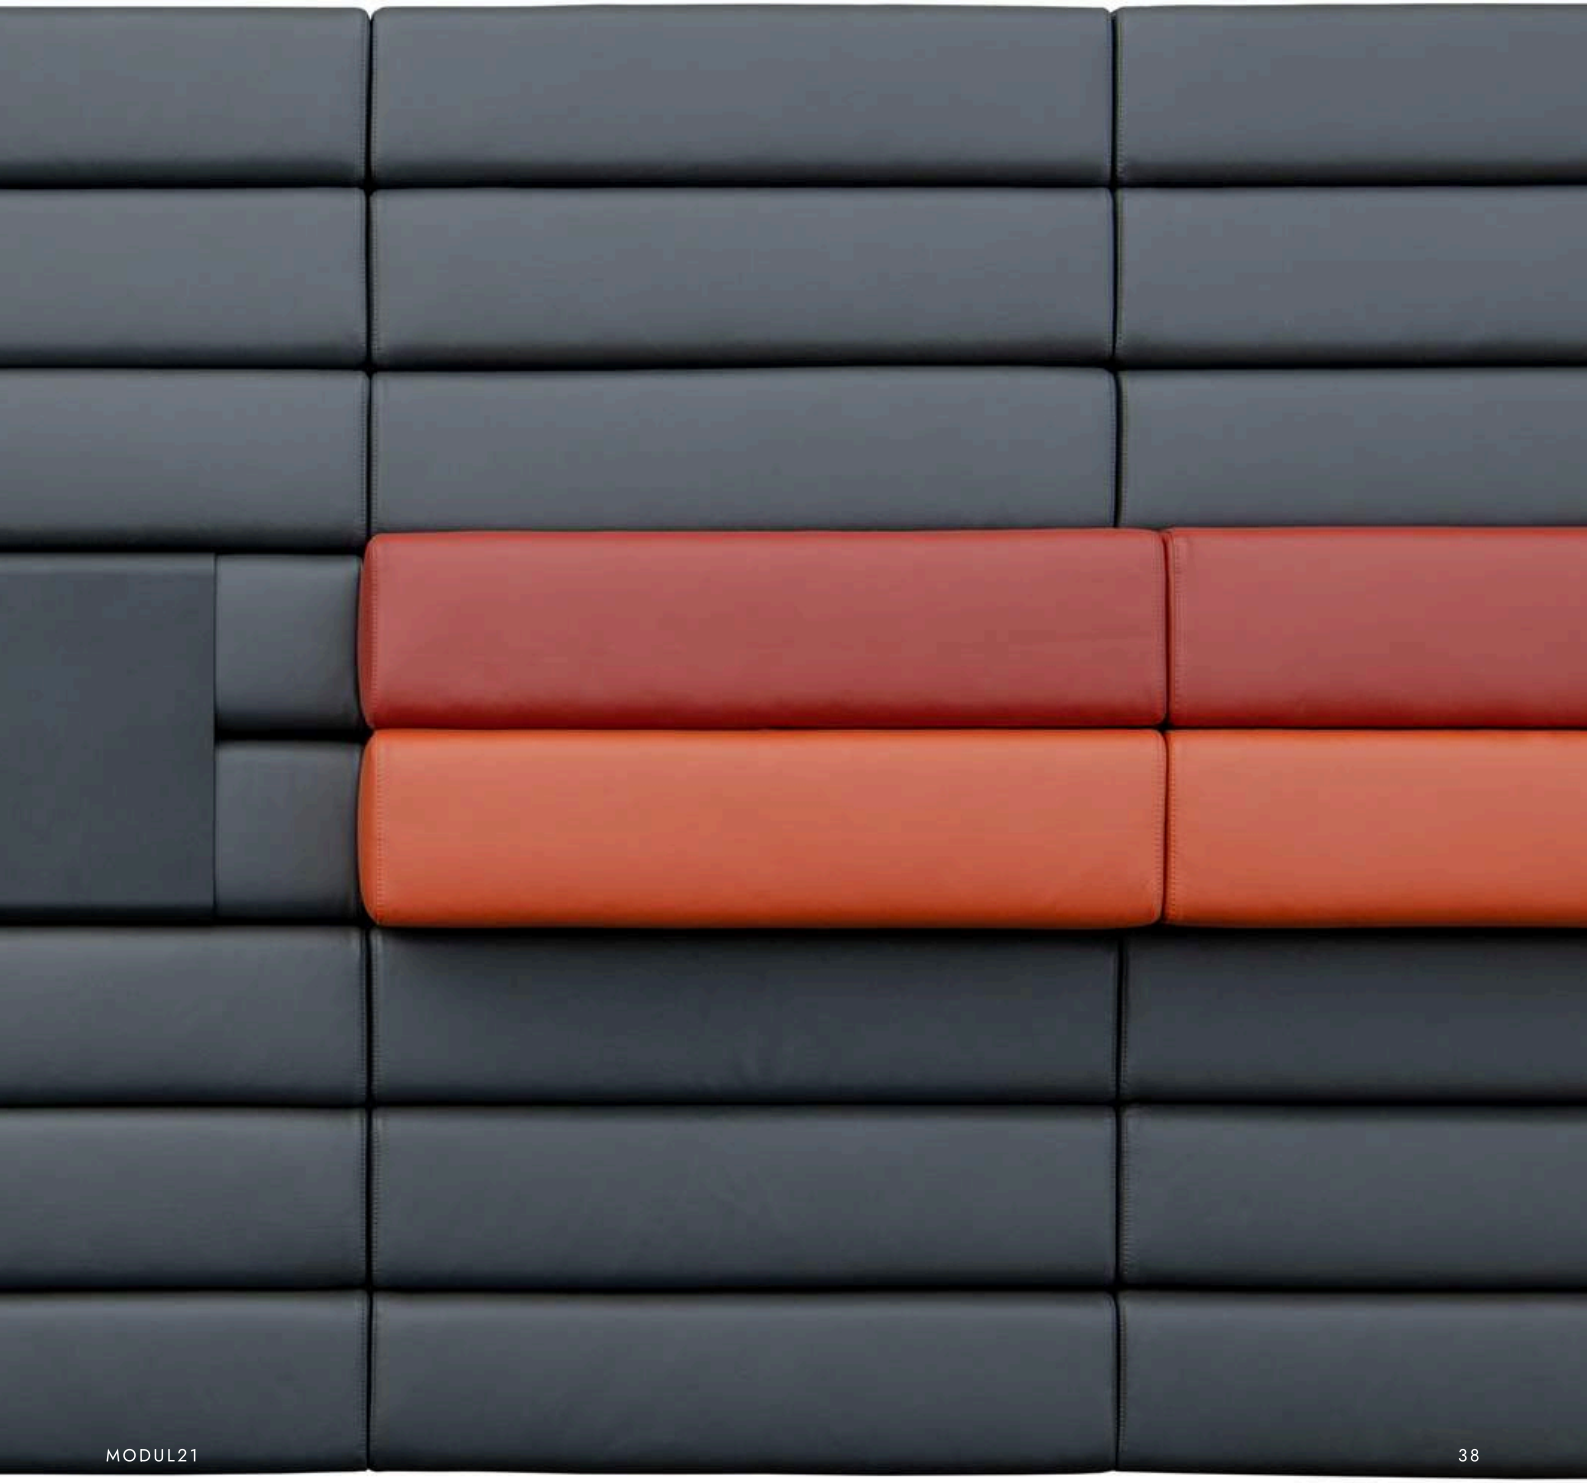

04 Seat modules · 20 cm grid

05 System beam · aluminium

06 Foot · aluminium

The modules are placed on the system beam and connected. This way every piece can be taken apart, transported and later rebuilt.

By hand, with attention to detail.

We work with materials from renowned manufacturers. Every piece is made individually to the customer's wishes: by hand, in Germany.

Fabrics and leather are ordered for each project and worked in the upholstery workshop. The result is a timeless and, above all, durable piece of furniture.

AWARD

German Design Award Special 2019

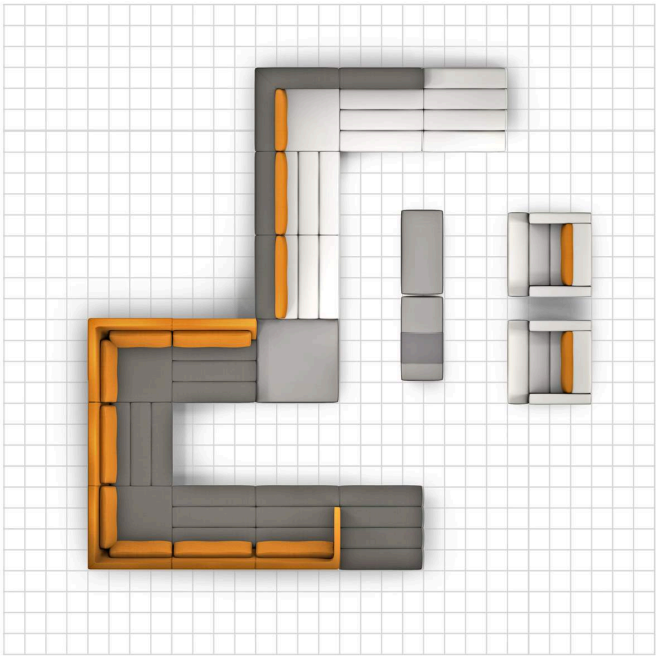

A grid of 20 centimetres.

Modules, beams, feet: how a few parts become any piece of furniture.

Width and depth follow one dimension.

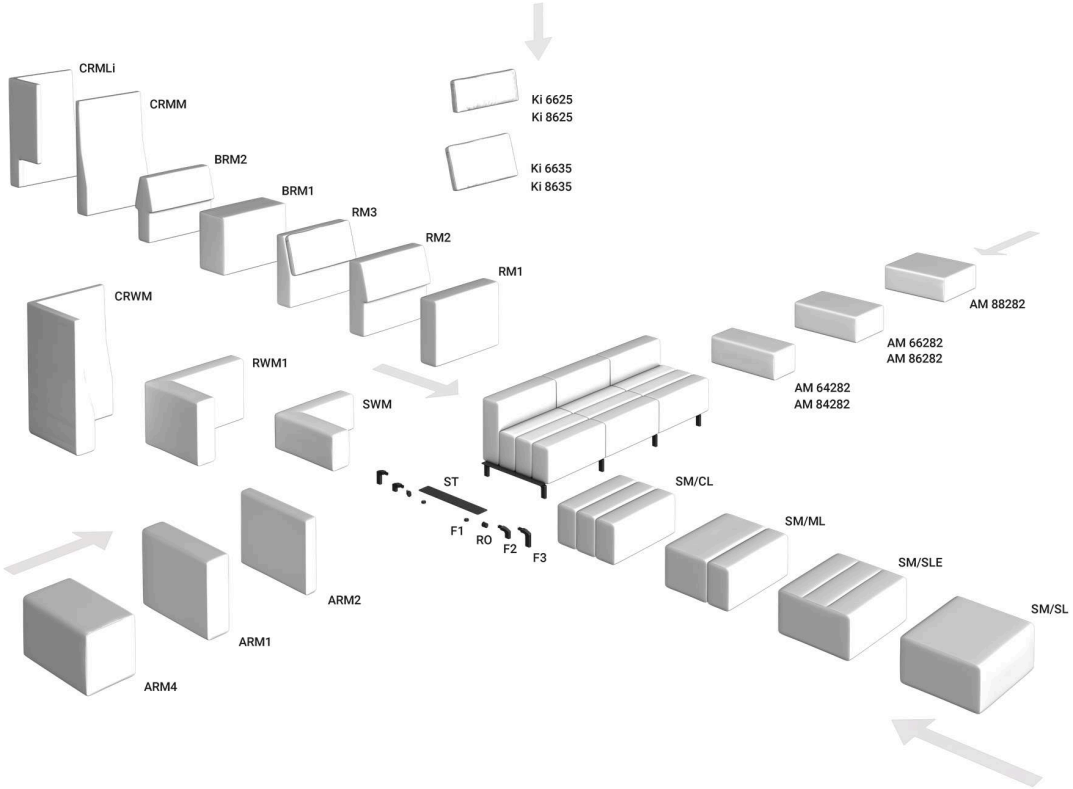

All upholstered modules follow the same 20 centimetre grid in width and depth. A specially developed aluminium support frame system connects them in any combination.

This way the piece can be adapted at any time to changing needs or spaces. The beam takes feet, glides or castors.

Grid	20 cm in width and depth
Lengths	Modules of 60 and 80 cm
Seat heights	37, 40 and 45 cm
Back heights	56, 66, 100 and 120 cm
Shapes	Row, corner, T, cross, island

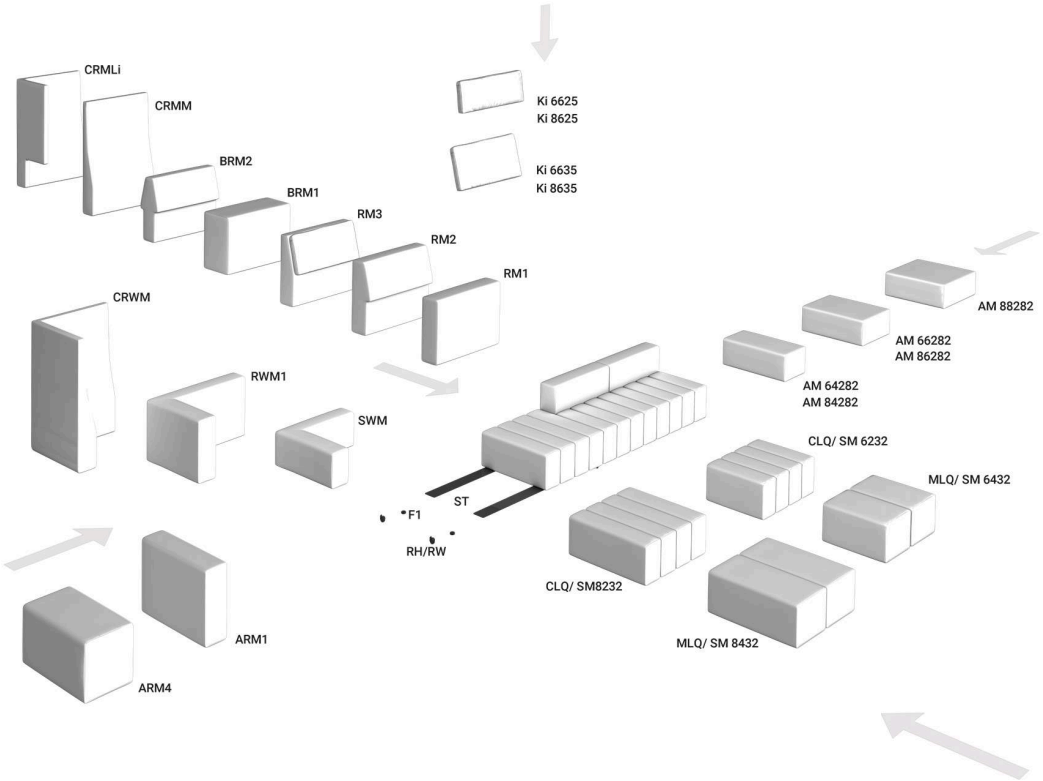

Modules across the seating direction.

When the seat modules lie across the seating direction, the system beams run in the seating direction. The length of the modules, 60 or 80 cm, defines the seat width; the depth grows on the grid.

Versions	CL, ML, SL, SLE, PL
Seat depth	any, on the 20 cm grid
Seat width	60 or 80 cm
Shelves	can be integrated

Modules in the seating direction.

In the second version the seat modules run in the seating direction and the system beams across it. It carries a Q in its name. Number, size and type of modules are free in every direction.

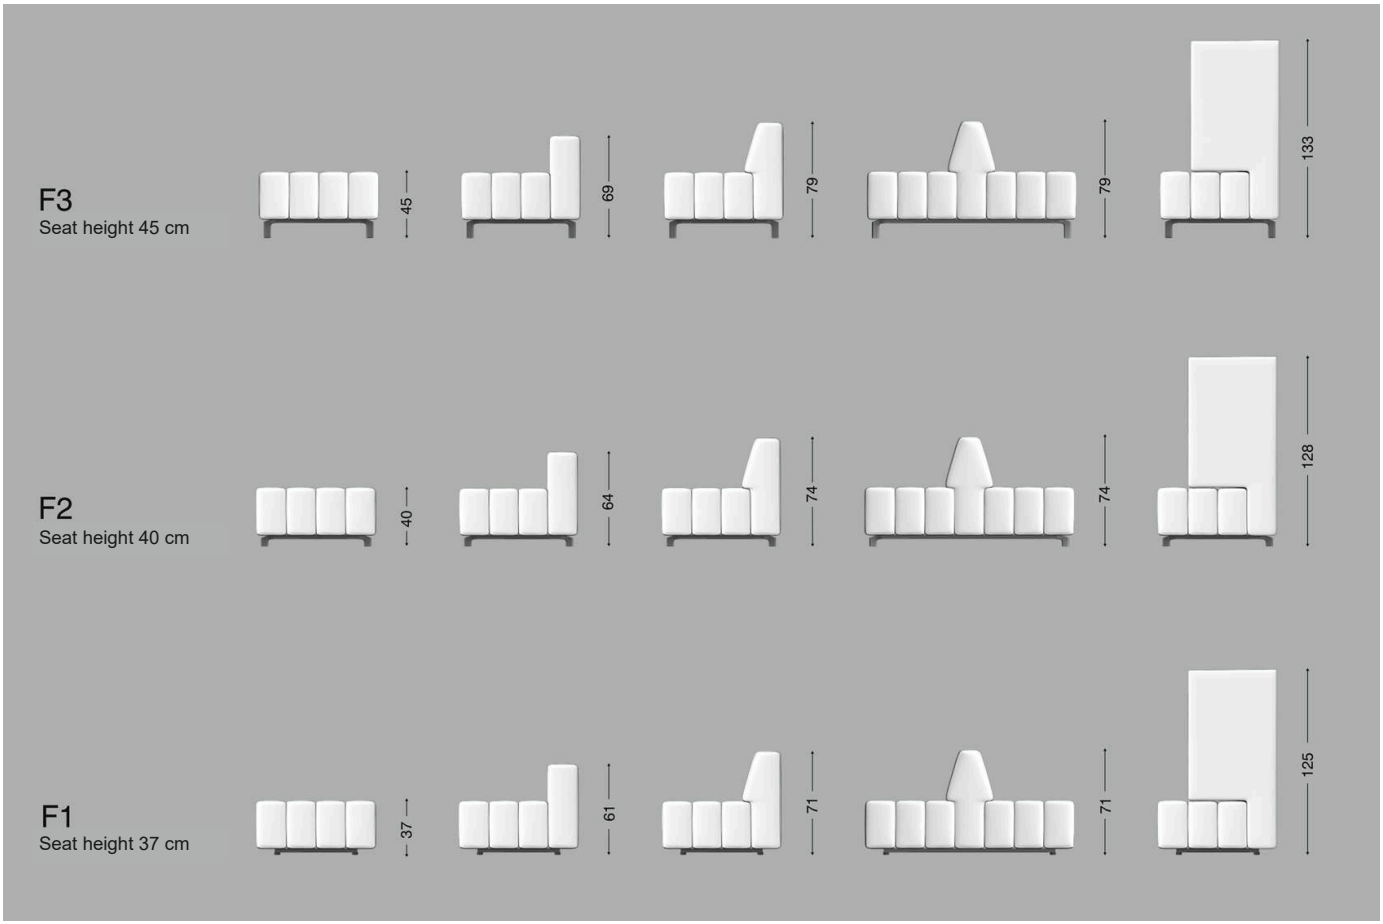

Versions	CLQ, MLQ
Seat width	any, on the 20 cm grid
Seat depth	60 or 80 cm
Corners	inside, outside, T and cross

Seven seat versions.

VERSION		CONSTRUCTION	DEPTH IN CM
CL **Classic**		Seat made of modules on a 20 cm grid. The finest division, for stools, benches, sofas and landscapes.	60–120
ML **Max**		Large 40 cm modules, supplemented by 20 cm modules where needed. A calmer surface, freely arranged.	60–120
SLE **Smart with recessed seams**		Continuous seat with two parallel recessed seams.	60 / 80
SL **Smart**		Continuous, smooth seat.	60 / 80
PL **Plus**		Continuous seat with a loose seat cushion on top.	60 / 80
CLQ **Classic crosswise**		20 cm modules in the seating direction, the system beams run crosswise. The width grows on the grid.	60–200
MLQ **Max crosswise**		40 cm modules in the seating direction, the system beams run crosswise.	80–200

SL, SLE and PL are also available as a high version with a 42 cm seat module (SLX, SLEX, PLX).

The foot defines the seat height.

Three foot heights give seat heights of 37, 40 and 45 cm. The glide surface is chosen to suit the floor covering. On castors the piece stays mobile.

F1	Seat height 37 cm
F2	Seat height 40 cm
F3	Seat height 45 cm
Castor R3	Seat height 42.5 cm

Booth, two sofas facing each other

Seating group with high back

L, U and island.

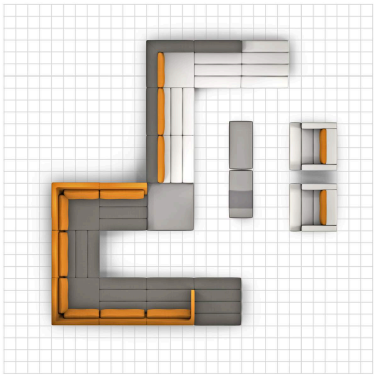

Inside and outside corners, T and cross shapes and offsets in depth: the beams are made to fit each design.

U shape

U shape with lounging area

Planning on the grid

Double row, back to back

Codes and dimensions.

The dimensions of a module are given in its number.

1st digit	Length: 6 = 60 cm, 8 = 80 cm
2nd digit	Width: 1 = 10, 2 = 20, 4 = 40, 6 = 60, 8 = 80 cm
3rd and 4th	Height: 28, 32, 56 or 66 cm, 12 = 120 cm

Example: **SM 6232** is a seat module 60 cm long, 20 cm wide and 32 cm high.

The end faces of all modules are always covered. Which long sides are covered depends on the position of the module in the piece.

SM	**Seat modules** The same cold-cure foam construction in all seat modules. They can be arranged freely, the seating comfort stays the same. SMmE: seat module with recessed seams.	SM 6232 · SM 6432 · SM 6632 · SMmE 6632 SM 8232 · SM 8432 · SM 8632 · SMmE 8632 · SM 8832
RM	**Back modules** Define back height, angle and seat depth. Upholstered even without cushions.	RM1 6256 · RM2 6266 · RM3 6266 RM1 8256 · RM2 8266 · RM3 8266
BRM	**Double-sided back modules** Upholstered on both sides, for rows of seats back to back.	BRM1 6256 · BRM1 6456 · BRM2 6366 BRM1 8256 · BRM1 8456 · BRM2 8366
CRM	**Cover back modules** High back panels of 120 cm, optionally with screening at the sides.	CRMM 6212 · CRMM 8212 CRMLi 8612 · CRMRe 8612 · CRWM

Back, arm, shelf, cushion.

ARM	**Armrest modules** ARM1 is 20 cm wide, ARM2 10 cm, ARM4 40 cm. ARM1 is upholstered like the back module RM1.	ARM1 6256 · ARM2 6156 · ARM4 6442 ARM1 8256 · ARM2 8156 · ARM4 8442
WM	**Corner modules** Seat corner module for the corner, back corner modules for back and armrest in one part.	SWM 8832 · RWM 8856 RWMLi1 10856 · RWMRe1 10856
AM	**Shelf modules** Covered on all sides. Inserted on the grid, or on glides or castors as a separate table.	AM 6428 · AM 6628 AM 8428 · AM 8628 · AM 8828
Ki	**Back cushions** Ki 6625 and Ki 8625 go with RM1, BRM1 and RWM1; Ki 6635 and Ki 8635 with RM3 and the cover back modules.	Ki 4535 · Ki 6625 · Ki 8625 Ki 6635 · Ki 8635
